WORK EXPERIENCE

Shiba Inu

Remote

Senior Software Engineer

Jun 2023 - Present

- Mentored junior engineers, providing hands-on guidance in code reviews and technology best practices.
- Trained and mentored team members on best practices for utilizing GitHub templates, resulting in a 25% improvement in overall PR clarity and consistency.
- Researched and identified top fiat-to-crypto on-ramps and aggregators to integrate into shibthemetaverse.io platform, resulting in a 50% increase in payment success rate for users.

Polygon

Remote

Frontend Engineer

Aug 2022 - Jun 2023

- Collaborated with cross-functional teams to identify and prioritize key components for JS to TypeScript conversion, resulting in a successful migration of 80% of the component library within six months.
- Developed and implemented new features for open-source UI libraries and JavaScript SDK.
- Implemented Sentry.io as a bug tracking and monitoring tool, resulting in a 30% decrease in production bugs and improving overall software quality.
- Contributed to a cutting-edge CMS system using Next.js, Contentful, and Tailwind CSS, resulting in a 50% decrease in product delivery time.
- Coordinated with the design team to develop standardized style guides and best practices, leading to an increase in the number of truly reusable components.

Klary

Saint Louis

Full Stack Software Engineer

Apr 2022 - Jun 2022

- Developed and implemented the Minimum Viable Product (MVP), utilizing a combination of frontend and backend technologies including React, SCSS, Redux, TypeScript, and Ruby on Rails.
- Optimized data storage and retrieval by designing a robust API structure, leveraging Neo4j and Cypher, resulting in unique understanding of our user connections.

Flatiron School

Remote

Software Engineering Technical Coach

Jun 2021 - Jan 2022

- Coached and guided students in Ruby on Rails, JavaScript, and debugging techniques, resulting in a significant increase in their overall comprehension and programming independence.

Xeragenx

Saint Louis

Web Developer

Jun 2019 - Jun 2021

- Revamped company website by implementing modern design elements and a user-friendly interface, resulting in a 1000% increase in organic website traffic.
- Conceived and built a custom Ruby on Rails backend integrated with a Webflow frontend system for a seamless and efficient management of customer test kit data, reducing management time by 200%.
